

Sorta Site Briefing

1. Global Direction

Positioning:

A next-generation recycling infrastructure company (not a “smart bin” manufacturer)

Primary Goals:

1. Build investor confidence
2. Generate PoC / pilot partner leads
3. Establish category authority

Tone:

- Minimal, precise, future-facing
- Confident but not over-explanatory
- Abstract where needed (IP protection)

Design Principles:

- Show outcomes, not mechanisms
- Use contrasting visuals (e.g. chaos → order)
- Avoid literal product explanation visuals

2. Hero Section

Objective:

Immediately, clearly communicate vision

Content:

- Headline (TBD):
 - Make horizontal recycling a reality
 - It just sorta... *makes sense*.
 -

- Subheadline (TBD):
 - Intelligent sorting and preprocessing at the point of intake.
 - Smarter, cleaner and more sustainable.
 -
- CTA (TBD):
 - “Partner with us”
 - “Learn more”
 -

Visuals:

- Cinematic video or image in the background, could be AI gen or from Adobe Stock
 - A bottle being crushed and then transforming back into a new bottle?
 - Tons of clear plastic bottles falling

2. Problem Section

Objective:

To frame the problem as systemic / unavoidable and costly to everyone (manufacturers, consumers, environment)

Content Structure:

- Key Message: Recycling failure happens before collection
- Supporting Points:
 - Contamination (liquid, labels, mixed waste) / data for horizontal recycling rate
 - Improper sorting at disposal stage / data for contamination rate
 - Downstream inefficiencies / labor cost
 (Statistics from deck)

Visuals:

Something that says “looks correct but actually failing”:

- Idea 1: line drawing of standard recycling box, looks good from outside, animation shows cross-section and you find all kinds of contaminants inside box
- Idea 2: video or photo of contaminated bottles
-

3. Solution (High-Level)

Objective:

Introduce approach while protecting IP

Content:

- Core Message:
Move critical recycling processes upstream
- Supporting Lines:
 - Sorting, separation, preprocessing at disposal point
 - Designed for real-world environments

Visuals:

- Input (mixed waste) → Output (clean streams)
- Abstract “black box” in between
- No internal detail

4. Value Proposition

Objective:

Communicate business + environmental value

Content (4 pillars):

1. High-quality recyclable material output
2. Reduced downstream processing costs
3. Cleaner, more hygienic environments
4. Improved sustainability outcomes

Visuals:

- Before / after comparisons (not sure how we could approach this yet – maybe simulating this in a numerical form is a high-priority to-do?)
- Clean vs contaminated states
- Minimal data-style visuals

5. Use Cases

Objective:

Drive relevance for potential PoC partners

Segments:

- Train stations and airports
- Public infrastructure (parks / streets)
- Shopping centers
- Office buildings
- Entertainment facilities
- Events / Venues

Visuals:

- Line art of each situation
- Suggest product presence without detail
- Focus on context, not device

6. Product Teaser

Objective:

Show product exists without exposing details

Content:

- Header:
Making horizontal recycling easier... for *everyone*.
- Description:
Sorta is a next-generation recycling system that brings sorting and preprocessing to the point of disposal—reducing contamination and enabling more efficient recycling.
- Features:
Sorta ***Detects, Sorts, Processes*** and ***Monitors*** (maybe we show these with icons)
↓
Preventing contamination of recyclables
Reducing recycling costs
Increasing collection efficiency
...all while making tossing trash simpler by removing human error from the equation.

Visuals:

- Animation video that we submit with our deck?

7. Traction / Status

Objective:

Build credibility at pre-seed stage

Content:

- Prototype development in progress
- Full-scale demo unit available Late 2026
- Seeking pilot / PoC partners

Visuals:

- Timeline (simple, forward-looking)
- Map with abstract nodes
- No over-claiming visuals

8. PoC / Partnership Section (Key Funnel)

Objective:

Convert companies into pilot partners

Content:

- Headline:
Partner with us to pilot next-generation recycling infrastructure
- Body:
Seeking partners in retail, public, and high-traffic environments.
Opportunity to co-develop and test in real-world settings.
- CTA (TBD):
 - “Apply for Pilot”
 - “Start a PoC Discussion”
- Form:
 - Company name
 - Industry

- Location
- Type of space (retail / public / event etc.)
- Estimated traffic / usage
- Contact info

Visuals:

Simple icons or minimal infographics

9. Vision / Mission

Objective:

Emotional + philosophical anchor looked for at pre-seed stage by investors

Content:

- Mission statement:
 - JP: 水平リサイクルが「目標」ではなく、「現実」になる世界を。
 - EN: Create a world where horizontal recycling is a reality, not a goal.
- Long-term vision:
 - Pull from deck

Visuals:

Simple icons or minimal infographics

10. Founding Team

Objective:

Build trust and credibility

Content:

- Names / Photos / Short bios
- Who we are recruiting

11. Why Now

Objective:

Strengthen investor / partner narrative

Content:

- Rising sustainability pressure
- Increasing material costs
- Limitations of current infrastructure
- Closing message:
The shift to circular systems requires ***new infrastructure*** at the ***point of intake***

Visuals:

Simple icons or minimal infographics, macroeconomic data (pull from deck)

12. Footer CTA

Objective:

Capture remaining interest

Content:

- Contact / Partnership CTA

Replit Build Prompt

SORTA — WEBSITE BUILD BRIEF

Build a modern, responsive marketing website for a brand called Sorta. Use the exact design system defined below. Do not deviate from the colors, fonts, or spacing tokens.

TECH STACK

- HTML5 + CSS3 (custom properties) + vanilla JavaScript
- No CSS frameworks (no Tailwind, no Bootstrap)
- Google Fonts for typography (loaded via <link> in <head>)
- Mobile-first, fully responsive (breakpoints: 375px, 768px, 1280px)

COLOR PALETTE

Define these as CSS custom properties in :root and use them throughout — never hardcode hex values in component CSS.

```
--color-gold:    #E1A200; /* Primary accent — CTAs, highlights */
--color-sky:     #00A5E5; /* Secondary accent — links, badges */
--color-navy:    #121C29; /* Dark background, footer, nav */
--color-mist:    #CDDFEF; /* Subtle borders, dividers, input bg */
--color-fog:     #F4F9FF; /* Page background, section fills */
```

```
/* Semantic aliases */
--color-bg-page:    var(--color-fog);
--color-bg-dark:    var(--color-navy);
--color-bg-surface: #FFFFFF;
--color-accent-primary: var(--color-gold);
--color-accent-secondary: var(--color-sky);
--color-border:     var(--color-mist);
--color-text-on-dark: #FFFFFF;
--color-text-body:   var(--color-navy);
--color-text-muted:  #4A6070;
```

TYPOGRAPHY

Load both fonts from Google Fonts:

```
<link
href="https://fonts.googleapis.com/css2?family=Rethink+Sans:wght@700;800&family=Quicksand:wght@400;500;600&display=swap" rel="stylesheet">
```

Define these tokens in :root:

```
--font-heading: 'Rethink Sans', sans-serif;
--font-body:    'Quicksand', sans-serif;
```

/* Heading rules — apply to ALL h1–h4 */

```
font-family: var(--font-heading);
font-weight: 800;
```

```
letter-spacing: 0.03em; /* 3% letter spacing */
color: var(--color-navy);
```

```
/* Desktop type scale */
```

```
h1: 56px / line-height 1.1
h2: 40px / line-height 1.15
h3: 28px / line-height 1.2
h4: 20px / line-height 1.25
```

```
/* Mobile type scale (max-width: 768px) */
```

```
h1: 36px / line-height 1.1
h2: 28px / line-height 1.15
h3: 22px / line-height 1.2
h4: 18px / line-height 1.25
```

```
/* Body rules — apply to p, li, td, input, label */
```

```
font-family: var(--font-body);
font-weight: 400;
font-size: 16px;
line-height: 1.7;
color: var(--color-text-body);
```

```
/* Body variants */
```

```
.text-large: 18px / weight 400 / line-height 1.7
.text-small: 14px / weight 400 / line-height 1.6
.text-label: 12px / weight 600 / letter-spacing 0.06em / uppercase
.text-button: 16px / weight 600 / font-family body
```

BUTTONS

```
/* Primary — gold fill */
```

```
background: var(--color-gold);
color: var(--color-navy);
font-family: var(--font-body);
font-weight: 600;
font-size: 16px;
padding: 14px 32px;
border-radius: 8px;
border: none;
```

```
/* Secondary — outlined */
```

```
background: transparent;
color: var(--color-navy);
border: 2px solid var(--color-navy);
```

/ On dark backgrounds — outlined white */*
color: #FFFFFF;
border: 2px solid #FFFFFF;

SPACING SCALE

--space-xs: 8px
--space-sm: 16px
--space-md: 24px
--space-lg: 48px
--space-xl: 80px
--space-xxl: 120px

Section vertical padding: var(--space-xl) top/bottom on desktop, var(--space-lg) on mobile.
Max content width: 1200px, centered with auto margins.
Inner content padding (mobile): 0 20px.

SORTA — WEBSITE CONTENT & SECTION UPDATE

HOW TO READ THIS PROMPT

Lines marked [DIRECTION] describe the goal, tone, and intent of each section.
Lines marked [CONTENT] are the actual words, copy, and data to put on the page.
Do not mix them up. DIRECTION shapes how you design and frame the section.
CONTENT is what the visitor reads.

OVERALL TONE & DESIGN DIRECTION

[DIRECTION]

The site serves two audiences simultaneously: potential PoC / pilot partners (companies in retail, transit, public infrastructure) and pre-seed investors.
Tone is confident, precise, and mission-driven — not startup-hype.
Avoid buzzwords. Every claim should feel grounded in engineering reality.
The brand feels like a serious deep-tech company, not a sustainability NGO.
Visual language: Bright, cinematic, minimal. Let whitespace and the navy background do the heavy lifting. Gold (#E1A200) is used sparingly for emphasis — not decoration.

SECTION 1 — NAV

[DIRECTION]

Minimal, sticky, dark. Navigation should feel like it belongs to an innovative tech company. No clutter. Logo on the left, links on the right, one CTA button.

[CONTENT]

Logo: Sorta

Nav links: Problem | Solution | Use Cases | Why Now | Our Team

CTA: "Get in touch" (primary gold button)

SECTION 2 — HERO

[DIRECTION]

The hero must land the vision in under 5 seconds. Tone: declarative, not aspirational. The background should be light.. Use a full-bleed background: either a looping video placeholder or a high-contrast image. A subtle sky-blue (#00A5E5) tinted overlay shape can add depth without distracting. The CTAs should sit side by side — gold primary, outlined-dark secondary.

[CONTENT]

Headline: Make horizontal recycling a reality.

Subheadline: Intelligent sorting and preprocessing at the point of intake.

 Smarter, cleaner, and more sustainable.

CTA primary: Partner with us

CTA secondary: Learn more

Background visual placeholder:

Use <https://placeholder.co/1440x860/121C29/CDDFED>

Alt text: "Cinematic visual of plastic bottles being recycled"

SECTION 3 — PROBLEM

[DIRECTION]

Frame the problem as systemic and structural — not a behavior problem. The reader should feel: "This is not anyone's fault, it's a design flaw in the system." Avoid blaming consumers. Tone is diagnostic, factual, slightly urgent. Use a light background (#F4F9FF) to contrast with the dark hero. Present 3 supporting points as stat-led cards — number large and in gold, label below in navy body text. Leave [STAT] placeholders

where real data will be inserted from the Sorta deck.

[CONTENT]

Section label (underline): The Problem

Heading: Recycling failure happens before collection.

Body: Most recycling systems are designed around the assumption that waste arrives clean and sorted. It doesn't. By the time recyclables reach processing facilities, contamination and improper sorting have already undermined their value.

Stat card 1:

Number: [STAT]%

Label: Horizontal recycling rate today

Stat card 2:

Number: [STAT]%

Label: Of recyclables contaminated at the point of disposal

Stat card 3:

Number: \$[STAT]B

Label: Annual downstream processing cost from contamination

Supporting points (3 items, icon + label + short sentence):

1. Contamination at intake

Liquids, labels, and mixed waste degrade material quality before collection even begins.

2. Improper sorting at disposal

Human error at the bin is the most consistent failure point in the recycling chain.

3. Downstream inefficiency

Facilities absorb the cost of sorting waste that should never have arrived mixed — in labor, energy, and rejected material.

SECTION 4 — SOLUTION

[DIRECTION]

Introduce the approach without revealing proprietary technical detail.

This is a "black box" section by design. Visually: show an input → process → output flow diagram. The middle node should be abstract and unlabeled (just the Sorta logo mark or a simple geometric shape).

Do not show internal mechanics. Tone: confident, engineering-led.
White background section.

[CONTENT]

Section label: Our Approach

Heading: Move critical recycling processes upstream.

Body: Sorta relocates sorting, separation, and preprocessing to the point of disposal — where intervention has the highest impact. The result is cleaner input for downstream facilities and a meaningfully more efficient recycling chain.

Flow diagram (3 nodes, left to right):

Input: Mixed waste stream

Middle: [Sorta] — styled as a black box, no internal detail

Output: Clean, separated material streams

Supporting lines (below diagram):

- Sorting and separation at the disposal point
- Preprocessing designed for real-world environments
- Compatible with existing downstream infrastructure

SECTION 5 — VALUE PROPOSITION

[DIRECTION]

Communicate value across two dimensions: business (cost, efficiency) and environmental (sustainability, circularity). Use a 4-pillar card grid.

Each card should feel data-adjacent — leave space for a before/after number or a placeholder metric. Background: fog (#F4F9FF). Cards: white with mist border. Icon circles in gold at 15% opacity.

[CONTENT]

Section label: Why It Matters

Heading: Better for the system. Better for the bottom line.

Pillar 1:

Icon: quality / diamond shape

Title: High-quality recyclable output

Body: Clean, separated material commands higher market value and reduces rejection rates at processing facilities.

Pillar 2:

Icon: cost / downward arrow

Title: Reduced downstream costs

Body: Less contamination means less labor, fewer rejected loads, and lower total processing cost per tonne.

Pillar 3:

Icon: hygiene / leaf or droplet

Title: Cleaner environments

Body: Preprocessing at intake reduces odor, liquid spillage, and hygiene issues at high-traffic collection points.

Pillar 4:

Icon: circularity / loop

Title: Improved sustainability outcomes

Body: Higher-quality inputs enable true horizontal recycling — closing the material loop rather than downcycling.

SECTION 6 — USE CASES

[DIRECTION]

This section's job is to make potential PoC partners self-identify. Each use case is a context, not a product feature. Tone: matter-of-fact. Visual treatment: minimal line-art illustration per context (suggest product presence without showing device detail). Use a dark navy background to differentiate from adjacent sections. Lay out as a 2-column or 3-column grid of context cards.

[CONTENT]

Section label: Where Sorta Works

Heading: Built for high-traffic, high-volume environments.

Use cases (6 cards, each with a line-art icon placeholder):

1. Train stations & airports
2. Public infrastructure — parks, streets
3. Shopping centers & retail
4. Office buildings
5. Entertainment facilities
6. Events & venues

Each card: context name as h4, one-sentence description of the disposal challenge in that environment. Example for card 1:

"High daily throughput with minimal staff oversight makes contamination control at the bin level essential."

Use <https://placeholder.co/80x80/121C29/CDDFED> for icon placeholders with matching alt text per context.

SECTION 7 — PRODUCT TEASER

[DIRECTION]

Confirm the product exists and is real — without exposing proprietary design. This is a credibility signal, not a spec sheet. Use a white background. Show 4 capability icons in a row. Below the icons, show a short cascade of outcome statements (3 lines, each preceded by an arrow or chevron in gold). If an animation video is available, embed it here as an autoplay muted loop — otherwise use a dark placeholder.

[CONTENT]

Section label: The Product

Heading: Making horizontal recycling easier... for everyone.

Body: Sorta is a next-generation recycling system that brings sorting and preprocessing to the point of disposal — reducing contamination and enabling more efficient recycling.

Capability icons (4, with label below each):

1. Detects
2. Sorts
3. Processes
4. Monitors

Outcome statements (gold chevron prefix):

- › Preventing contamination of recyclables
 - › Reducing recycling costs
 - › Increasing collection efficiency
- ...all while removing human error from the equation.

Video placeholder:

Use <https://placeholder.co/1000x560/121C29/00A5E5>

Alt text: "Sorta product animation — coming soon"

SECTION 8 — TRACTION / STATUS

[DIRECTION]

Build credibility without over-claiming. This is a pre-seed company — the tone should convey momentum, not maturity. A simple horizontal timeline with 3 nodes is the right visual. Fog background. Do not use progress bars or percentage-complete indicators — they imply more certainty than is appropriate at this stage.

[CONTENT]

Section label: Where We Are

Heading: Building toward full-scale deployment.

Timeline (3 nodes, left to right):

Node 1 (current): Prototype development in progress

Node 2: Full-scale demo unit — Late 2026

Node 3: Pilot / PoC deployment

Below timeline:

"We are actively seeking pilot partners to co-develop and test
Sorta in real-world environments ahead of commercial launch."

SECTION 9 — PARTNERSHIP / POC (KEY FUNNEL)

[DIRECTION]

This is the primary conversion section. Everything on the page leads here. Design it to feel like a serious B2B inquiry form — not a consumer contact form. Use a two-column layout: left side has the heading, body copy, and 3 brief value points for the partner. Right side has the form. Background: navy. All text on dark. Form fields: light border, dark background inputs. CTA button: gold.

[CONTENT]

Section label: Partner with Us

Heading: Pilot next-generation recycling infrastructure.

Body: We are seeking partners in retail, public, and high-traffic environments to co-develop and test Sorta in real-world settings.

Partner value points (3 bullet lines):

- Early access to the technology before commercial launch
- Joint development input on deployment and UX
- Measurable impact data from your own environment

Form fields:

- Company name (text input)
- Industry (dropdown: Retail / Transit & Airports / Public Infrastructure / Office / Entertainment / Events / Other)
- Location (text input)
- Type of space (dropdown: Retail / Public / Office / Event Venue / Other)
- Estimated daily footfall / usage (text input)
- Contact name (text input)
- Email address (email input)
- Message / notes (textarea, optional)

CTA button: "Apply for Pilot"

Secondary link below button: "Start a PoC discussion →"

SECTION 10 — VISION / MISSION

[DIRECTION]

This is the emotional and philosophical anchor — primarily for investors reading at pre-seed stage. Keep it short and powerful. A single centered block of text on a white background. The Japanese mission statement should appear above the English one, styled slightly smaller and in muted navy. No icons needed here — let the words carry the weight.

[CONTENT]

Section label: Our Mission

Japanese:

水平リサイクルが「目標」ではなく、「現実」になる世界を。

English:

Create a world where horizontal recycling is a reality, not a goal.

Long-term vision (pull 2–3 sentences from the Sorta investor deck — leave as [VISION COPY — INSERT FROM DECK] placeholder for now).

SECTION 11 — FOUNDING TEAM

[DIRECTION]

Trust and credibility signal. Clean, minimal. White background.

Each founder in a card: circular photo, name, title, 2-sentence bio.

Use placeholder avatars for now. Include a "We're hiring" row below

the founder cards with a brief note on open roles.

[CONTENT]

Section label: The Team

Heading: Built by people who understand the problem.

Founder cards (repeat per founder — fill with real data when available):

Photo placeholder: <https://placeholder.co/120x120/CDDFED/121C29>

Name: [Founder Name]

Title: [Role]

Bio: [2-sentence bio — INSERT FROM DECK]

Hiring note below cards:

"We are recruiting across engineering, operations, and partnerships.

Interested? hello@sorta.co"

SECTION 12 — WHY NOW

[DIRECTION]

Strengthen the investor narrative by grounding the opportunity in macroeconomic and regulatory tailwinds. Tone: analytical, not alarmist. Three short columns with an icon, a bold stat or trend label, and 2–3 sentences of context. Fog background. Close the section with a single strong closing sentence centered at the bottom — this functions as the thematic bridge into the footer CTA.

[CONTENT]

Section label: Why Now

Heading: The infrastructure moment has arrived.

Column 1:

Icon: regulatory / document

Label: Rising sustainability pressure

Body: Extended producer responsibility legislation is expanding globally, increasing liability for material end-of-life outcomes. [Insert data from deck]

Column 2:

Icon: cost / upward arrow

Label: Increasing material costs

Body: Virgin material prices and landfill costs are rising, making high-quality recycled feedstock economically

attractive for the first time at scale. [Insert data]

Column 3:

Icon: infrastructure / grid

Label: Limits of current infrastructure

Body: Existing recycling infrastructure was not designed for the volume or variety of materials in circulation today. Retrofitting is insufficient.

Closing line (centered, h3 size, navy):

"The shift to circular systems requires new infrastructure at the point of intake."

SECTION 13 — FOOTER CTA

[DIRECTION]

Capture remaining interest from visitors who scrolled the whole page but didn't convert earlier. Gold background. Navy text. Simple: one heading, one sentence, two CTAs side by side.

[CONTENT]

Heading: Ready to rethink recycling infrastructure?

Body: Whether you're a potential partner or an investor, we want to hear from you.

CTA primary: Apply for Pilot (navy button, white text)

CTA secondary: Get in Touch (outlined navy button)

SECTION 14 — FOOTER

[CONTENT]

Background: var(--color-navy)

Logo: Sorta (Rethink Sans 800, gold)

Links: Problem | Solution | Use Cases | Partner with Us | Contact

Copyright: © 2026 Sorta. All rights reserved.

Email: hello@sorta.co

PLACEHOLDER CONVENTIONS

Anywhere you see [STAT], [INSERT FROM DECK], or [VISION COPY], leave a visually styled placeholder — a muted box with italic text "Data to be added" — so the layout is complete and reviewable without the real content. Do not invent or estimate statistics.
